

Kunal Rai

Full-stack developer in New Delhi | +91 7289907531 | github.com/VampKunal

Profile

I am Kunal Rai, a computer science undergraduate focused on full-stack web products, real-time collaboration, and AI-powered user experiences. I like systems that feel simple on the surface but are engineered thoughtfully underneath.

Education

B.Tech in Computer Science - Bennett University, Greater Noida - September 2023 to September 2027

Current GPA: 8.08. Coursework: Data Structures, Algorithms, DBMS, Artificial Intelligence, System Design, Computer Networks, Software Engineering.

Top 11% placement in a global programming contest, alongside 400+ LeetCode problems across dynamic programming, graphs, greedy methods, and binary search.

Projects

IdeaRoom - Real-time collaborative whiteboard

Stack: Next.js, Node.js, Socket.IO, Redis, RabbitMQ, Docker

A collaborative drawing product built around live canvas synchronization, resilient backend services, and production deployment paths. Proof: 4-service backend architecture, Redis-backed retrieval path, RabbitMQ snapshot workflow.

EKLAVYA - AI voice tutor

Stack: Next.js, TypeScript, OpenAI API, Web Speech API

An AI learning assistant designed for hands-free tutoring: students can speak, listen, answer quizzes, and receive generated practice material. Proof: Speech recognition flow, text-to-speech lessons, adaptive quiz difficulty.

VIBLY - Chat and video platform

Stack: React, Node.js, MongoDB, Stream APIs, Zustand

A social communication app combining real-time messaging, video calling, friend workflows, presence indicators, and theme customization. Proof: Friend request flows, presence indicators, cached client state.

Skills

Frontend	Next.js, React, Tailwind CSS, Responsive UI, App Router
Backend	Node.js, Express.js, Socket.IO, API Design, Microservices
Data	MongoDB, PostgreSQL, Redis, RabbitMQ, Caching
Languages	JavaScript, TypeScript, Python, C++
Delivery	Git, GitHub, Docker, Vercel, Railway
